

PROJECT TITLE:

El Camino de la Luz Bridge Trestle Repairs Project

WHY THIS PROJECT?

The City is repairing the original concrete trestles that support the bridge. They were first constructed in the mid 1950's.

Although it is clear that other parts of the bridge are also in need of repair, this project will start with the structural supports giving them a treatment that will extend the design life for another fifty years. Subsequent improvements will be scheduled for the bridge as funding is authorized.

PROJECT BENEFITS:

There are three concrete trestles that support the bridge and are in need of patch repairs. As the structure ages, the concrete shows signs of spalling and cracking. To prevent further deterioration, the City will repair all the large cracks and seal the entire surface of the trestles with epoxy coated paint for extra protection.

QUICK FACTS

Location: Mesa area, between Mesa Park and City street, El Camino de la Luz

Design Schedule: summer 2019 – summer 2020

Construction Schedule: December 2020 – January 2021

Total Project Costs: \$86,000

Funding Source: Wastewater Capital Fund
